## Crisis

In "line" to Pres  
K, John  
uses the Pres as  
more accepting of  
his intentions  
than his <sup>pres'</sup> domestic  
banks

---

Improving and  
"favor"

(as JFK, she thought  
they should be  
tied Pres. is pretty

(What if words are chosen by  
"axies of total chain"?!)

(Received Prof

if not: axies only, "action  
are not considered as communications"

Action spell both  
those words

But if an is

to be silent

to confuse

to deceive / lie

to distract

to control

to mislead?

Action chain will  
not be affected by  
what set of action  
is to be repeated.

## "Rewarded Prof"

"The art of rational choice" will appear  
as explanation — &  
thesis, a doctrine of  
sharing — not to be  
<sup>reasonable</sup> measurable for choices  
any messages, what  
is to convey  
meaning, information  
(not meaning complete,  
truthful or "relevant").  
and to affect attention,  
awareness, motivation,  
vigilance ...

But if this is so, then  
these actions are  
normative only when  
actions are not  
intended, or expected, to  
be at all consequential  
(how often is that?)
